Experience

Product Design Intern @ Mercury

Jun 2026 – Present

Developed and shipped designs for Mercury's activation team using traditional design software and emerging AI technologies. Planned and conducted unmoderated user research and AB tests based on a design hypothesis. Explored future-facing designs for Mercury's relationship between their product and AI-powered user flows. Collaborated closely with designers and engineers to develop real code and submit several successful PRs.

Product Design Intern @ TikTok

Sep 2025 – Apr 2026

Explored and designed human-AI interactions for TikTok's Effect House and Creation teams. Proposed new user flows and interfaces that improve TikTok's creation experiences. Conducted competitive analysis and iterative design to create key features that enhance user experience. Designed 100+ icons and key visual identities for Effect House's web app.

Interaction Designer Intern @ Stealth AI Startup

Aug – Sep 2025

Assisted with leading design strategy and a UI redesign for their mobile application. Created wireframes, interaction flows, and design specifications to guide development. Thrived in both directed and ambiguous environments to push and achieve business goals.

Product Design Capstone @ EA

Jan 2025 – Jun 2026

Developed an innovative mobile product with EA designers that leveraged AI to enhance second-screen gaming experiences. Leveraged AI design workflows for synthesizing research and developing design iterations. Conducted user tests to guide design decisions and develop iterative design ideas.

Education

University of Washington, Seattle, WA

Sep 2022 – Jun 2026

Bachelor of Science — Human Centered Design & Engineering

Skills

Product Design & Research

UI/UX, Visual Design, Motion Design, Rapid Brainstorming, Design Systems, Design Frameworks, Critical Design Thinking, Information Architecture, Usability Testing, User Interviews, Heuristic Analysis, A/B Testing

Design & Development Tools

Figma, Cursor, Jitter, Photoshop, Illustrator, Webflow, After Effects, Cavalry, GSAP, P5.js, Three.js, Java, HTML/CSS, JavaScript, React, Firebase, Onshape, Rhino
